## CURRICULUM MAPS

The tables below offer suggested course sequences for optimal degree completion, based on full-time or part-time enrollment. Students enrolled in or planning to enroll in the graduate student health insurance plan, must maintain full-time student status ( 9 credits) every semester they are enrolled. Students completing the two year track (see below) must request an underload from the graduate school before their last semester to maintain eligibility in their last semester, which requires only 6 credits. Please alert the graduate program director if this applies to you.

## Information for Part-Time Students

Students wishing to enroll part-time must complete the program (33 credits) within 5 years. Part-time students may elect to take one or two courses per semester, or a combination that best fits their personal schedule. Students electing to complete only one course per semester must take at least one summer course to ensure on-time degree completion. Potential course sequences for part time students are listed below. Actual plan of study may be modified to fit your needs.
