

Stony Brook University  
College of Arts and Sciences

**Department of Biochemistry & Cell Biology**

In Memoriam: Judith Campisi

We are sad to report that our distinguished alumna Judith (Judy) Campisi passed away recently. Judy received a B.S. in Chemistry from Stony Brook and then a Ph.D. in Biochemistry in 1979 with Carl Scandella. She went on to become a leading figure in the field of cellular senescence and aging working at Lawrence Berkeley Laboratories and then the Buck Institute for Research on Aging. Her accomplishments were recognized by election to the National Academy of Sciences in 2018.

You can learn more about Judy and her career here:
