

**OEE's Spring 2023 Wrap Up for Assessment Coordinators
May 24, 2023**

Dear Assessment Coordinators,

Congratulations on a successful Spring semester! It has been an eventful year for OEE and we have made tremendous progress thanks to your support and engagement with academic assessment. As we approach the Summer semester, we wanted to share some updates on our current assessment initiatives.

- **Program Assessment**

- We are pleased to share that we currently have received 95% of all program assessment reports from the 2022-2023 academic year! The SBU [Assessment Council](#) is actively reviewing these reports and will provide programs with feedback to improve their assessment processes for the next cycle.
- As we enter the 2023-2024 assessment cycle, be sure to check out our [website](#) for templates and resources to guide your updated submission by February 23, 2024.
- The Assessment Council developed the [Academic Program Assessment Policy](#) and accompanying [Procedures](#) to provide structured guidance to programs and assessment coordinators.

- **General Education Assessment**

- We are wrapping up our guided conversations with instructors teaching over 100 Stony Brook Curriculum general education courses. It has been a wonderful experience to connect with our faculty colleagues, learn more about SBC courses, and understand how our students are performing in the SBC learning outcomes. We are compiling the results of this assessment initiative which will be shared with the campus community in aggregate during the Fall semester.
- If you participated in a Gen Ed assessment meeting, you should have received a link to a brief feedback survey earlier today. We encourage you to complete the survey so that we can learn how to improve this process in the future.

- **Fall Assessment Programming**

- We are looking forward to hosting our 2nd annual Assessment Symposium this Fall and encourage you all to attend! A formal Save the Date will follow in the coming months.
- If you have suggestions for guest speakers or discussion topics at the Assessment Symposium, or ideas for workshops/programming that would be useful to you as an assessment coordinator, please let us know at EducationalEffectiveness@stonybrook.edu.

Thank you for all of your hard work so far this year - it does not go unnoticed. Wishing you a wonderful Summer season!

Best,

Office of Educational Effectiveness
Office of the Provost
